AMRITHA SIVAKUMAR

UI/UX & Product Designer

Bangalore, India | Email | Portfolio | Linkedin | Behance

PROFESSIONAL SUMMARY

I began my career in design and grew into product design through one simple habit: asking people what they actually need. With 7+ years of professional design experience across 100+ clients, including leading a team of four, I have grown from client design delivery into research-led mobile and web experiences, backed by 31 user interviews, a documented component library and usability-tested prototypes. I pair certified UX methods and frontend foundations with a designer's eye for detail, so ideas stay human and buildable. I am looking for a UI, UX or product design role where craft, empathy and clear thinking shape every decision.

SKILLS

Design: UI design, visual hierarchy, typography, colour systems, design systems, Figma variables, responsive design, micro-interactions

UX & Research: User interviews, surveys, personas, journey mapping, information architecture, user flows, usability testing, heuristic evaluation, UX writing (PACE)

Tools: Figma, FigJam, Adobe XD, Adobe Illustrator, Photoshop, wireframing, interactive prototyping, developer handoff documentation

Frontend & Accessibility: HTML5, CSS3, JavaScript (ES6+), component-based layouts, WCAG 2.1

AI & Collaboration: ChatGPT, Gemini, Google Stitch, generative AI for ideation, Agile/Scrum, team mentoring, stakeholder communication

PROJECTS

Kreāte: AI-integrated marketplace for local artisans

Mobile app | Figma, ChatGPT, Gemini, Stitch | Coursework

- Ran 16 interviews (8 artisans, 8 buyers) and benchmarked 5 platforms, then designed separate artisan and buyer journeys with three AI features: listing suggestions, photo search and the KBot assistant.
- Built a terracotta-and-navy visual system in Poppins, wrote screen microcopy with the PACE framework, and used a 10-task usability test to shape the next improvements.

Twine: a purpose-driven social app

Mobile app and responsive web | Figma | Coursework

- Combined 5 interviews, a survey and competitor research to define digital fatigue, then prioritised features with MoSCoW and designed Intent Weaver personalisation, Knot messenger and a wellbeing dashboard.
- Created a calm dark-theme interface with responsive layouts at 390, 834 and 1440px, and made three design iterations after usability testing.

Narrative Flow: AI-assisted book discovery

Mobile and web app | Figma | Coursework

- Ran 10 reader interviews and a 30-person survey, benchmarked 4 competitors, and mapped a four-phase journey around the emotional side of choosing a book.
- Designed AI-curated discovery, Community Consensus insights and an Ask AI prompt across mobile and web, then wrote an 8-task usability script to guide the next iteration.

Scalable Design System: Google Pay UI Study

Design system | Figma (auto-layout, variants, variables) | Self-initiated study

- Audited Google Pay's dark theme and rebuilt its key parts as a Figma library of ten documented components using auto-layout, variants and variables.
- Documented purpose, states, properties and usage guidelines for each component and applied them across seven usage screens.

Rapido Redesign: Ride-Booking Experience

Mobile app redesign | Survey, affinity mapping, sketches | Self-initiated

- Analysed an 8-response survey and app reviews, then redesigned Rapido's ride-booking flow across six screens to fix pickup accuracy, OTP verification, pricing transparency and scheduling.
- Created the persona Priya, a six-stage journey map, hand sketches and annotated mockups that compare the current app with the redesign.

Reel Feed Interactive Prototype

Interactive prototype | Figma, mobile and tablet | Self-initiated study

- Built a high-fidelity interactive prototype of a reel feed with seven core interactions, including smooth scrolling, a heart-pop like animation, a slide-up comment panel and a share sheet.
- Created dark and light themes and mobile and tablet prototypes using a style guide with variables and a component library.

PROFESSIONAL EXPERIENCE

Creative Design Lead

Trucolors / Prepster | Sep 2022 – Oct 2025 | Remote

- Led and mentored a team of 4 designers while staying hands-on: researching client briefs, developing concepts and presenting them to clients.
- Set up shared guidelines, templates and workflows that sped up turnaround and improved client sign-off rates.
- Wrote production-ready specification sheets in Adobe Illustrator that guided sample making and production.
- Partnered with cross-functional teams to turn client requirements into designs that met timelines and brand standards.

Executive Designer

Advanced Clothing Concepts / Scribbles | Dec 2017 – Mar 2022 | Tamil Nadu, India

- Developed concepts from client briefs, using storyboards, mood boards and colour palettes to present ideas clearly.

- Worked directly with stakeholders to turn briefs into production-ready assets and specification sheets in Adobe Illustrator.
- Organised vector libraries in Adobe Illustrator, improving asset retrieval and production efficiency.

EDUCATION & CERTIFICATIONS

Bachelor of Technology, Kumaraguru College of Technology, 2014 – 2018, 85.0%

UI/UX Design Specialization, Internshala Trainings, 2025

Responsive Web Design Certification, freeCodeCamp, 2025

Diploma in Digital Designing, Yellow Tree Academy, 2016 – 2017
